Summary

Full Stack Developer with expertise in React.js, Next.js, TypeScript, Node.js, Express.js, Django, MongoDB, and PostgreSQL, building scalable web applications, SaaS platforms, and AI-powered solutions. Delivered 10+ production-ready applications with REST APIs, authentication systems, automation workflows, and cloud integrations in Agile environments.

Experience

Full Stack Developer – F9 Cybrisk Private Limited, Bangalore Jan 2026 – Present

- Contributed to the development of **Brewkspace AI**, an AI-powered SaaS platform for property intelligence and document analysis, leveraging AI agents, automated workflows, and data extraction pipelines.
- Engineered scalable frontend and backend solutions using React.js, Next.js, TypeScript, Node.js, and PostgreSQL, while integrating **Razorpay** for subscription billing, payment processing, and SaaS monetization.
- Engineered backend services and content verification workflows for **CtrlFake**, an AI-powered misinformation detection platform, ensuring high-fidelity data processing.
- Partnered in the development of **Seovate**, an AI-driven SEO automation SaaS platform, contributing to frontend and backend architecture, database design, analytics dashboards, and data visualization workflows.
- Streamlined deployment workflows across the full SDLC in an Agile environment, utilizing CI/CD principles to reduce deployment times and minimize production bugs.

Full Stack Developer Intern – KodNest, Bangalore Jan 2025 – Jul 2025

- Built and deployed dynamic, responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) within two-week Agile sprint cycles.
- Designed and integrated 15+ RESTful APIs, optimizing frontend-backend data exchange and reducing data retrieval latency by approximately 20%.
- Developed a centralized library of reusable UI components and enforced strict version control using Git/GitHub, accelerating overall team development speed by 15%.

Projects

PostPilot AI – Social Media Automation SaaS Platform 2026 – Present

- Engineered a SaaS-based social media automation platform to streamline content scheduling, publishing workflows, campaign management, and performance tracking across multiple channels.
- Architected scalable full-stack modules utilizing React.js, Next.js, TypeScript, Node.js, and PostgreSQL, incorporating secure authentication and robust user management systems.
- Designed and deployed secure REST APIs, automated workflows, and interactive analytics dashboards, significantly enhancing content automation and platform scalability.
- Integrated the **Razorpay Payment Gateway** to facilitate seamless subscription management, automated billing cycles, and secure premium plan purchases.

Skills

Programming Languages: JavaScript (ES6+), TypeScript, Python, C++
Frontend Technologies: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, ShadCN
Backend Technologies: Node.js, Express.js, Django, REST APIs
Databases: MongoDB, PostgreSQL, SQL
Cloud Technologies: AWS EC2, AWS S3, AWS SES, AWS Lambda
Tools & Concepts: Git, GitHub, Postman, VS Code, Jira, JWT Authentication, API Integration, Razorpay, Firebase, SDLC, Agile Development

Education

G. Pulla Reddy Engineering College, Kurnool Aug 2021 – May 2025
Bachelor of Technology in Computer Science and Technology
CGPA: 7.9/10

Achievements

- Global Nominee, NASA Space Apps Challenge.
- Team Lead, XR Fusion Hackathon Sponsorship Team (250+ participants).
- Award Winner, Best Innovative Business Idea – Centre of Innovation and Entrepreneurship Club.
